Subject: RE: Monthly Progress Reports

Good afternoon Stephen,

Will do.

FYI. We collected the previous water samples for colloidal dioxin analysis for informational purposes and did not attempt to collect a background or reference sample. I will verify Vista Analytical's certifications. And, we do not currently, nor do we anticipate, any plans to remediate dioxin contaminants in the spring water emanating from the mouth of New Cricket Spring. If our position changes regarding remediation of the New Cricket Spring for dioxin contaminants, we will provide information in the Projected Activities section of the monthly progress reports.

If you have any questions, please let me know.

Best Regards,

Jim
